(FIU) FLORIDA INTERNATIONAL UNIVERSITY cont.

The universe for this illustration is constrained to 1) Five of Florida's 97 colleges offering film related degrees; and 2) only the actual number of graduates for five film and television related degrees. (In all, these schools offer more than 12 film-related degrees.)

Omitted from these charts are findings from the remaining colleges, plus dozens of additional film and television industry-related degrees (including media production, computing technology, digital arts, computer animation, television production, interactive entertainment, mass communication, creative media, motion pictures, and broadcasting).

If Florida had a flourishing film industry, these students would fulfill roles as production assistants, writers, production managers, cinematographers, directors, and producers. Unfortunately, these jobs scarcely exist in Florida, and the vast majority of graduates will be forced to relocate to a state with a strong entertainment industry presence.

These students' contributions to Florida's GDP and Florida's ability to earn a reasonable ROI depends on whether or not we succeed in resurrecting Florida's film industry.
